

HOW TO BUY THE BRIL TOKEN

First, you should open an account on **Coinbase** if you haven't done so:

<http://www.coinbase.com>

It might take a while to get verified, but there you will be able to buy crypto with a bank account and/or credit card.

The crypto you are interested in order to buy BRIL is **Ethereum**.

Then, go to <https://www.myetherwallet.com/> and create a new wallet. On the first page choose a **strong** password (important).

New Wallet Send Ether & Tokens Swap Send Offline Contracts ENS DomainSale Check TX Status View

Create New Wallet

Enter a password

Create New Wallet

This password *encrypts* your private key. This does not act as a seed to generate your keys. You will need this password + your private key to unlock your wallet.

[How to Create a Wallet](#) · [Getting Started](#)

Then download the UTC file which will give you access to your wallet later on:

Save your **Keystore** File.

[Download Keystore File \(UTC / JSON\)](#)

****Do not lose it!**** It cannot be recovered if you lose it.

****Do not share it!**** Your funds will be stolen if you use this file on a malicious/phishing site.

****Make a backup!**** Secure it like the millions of dollars it may one day be worth.

[I understand. Continue.](#)

UTC--2018-...dc457498c ^

Save your private key. DO NOT SHARE WITH ANYONE this will be the key to your account.

Save Your **Private Key**.

eee0257adac50073e69e8e54d85eb80d

Never share this key!

[Print Paper Wallet](#)

**You can print a paper wallet for backup /
extra security**

****Do not share it!**** Your funds will be stolen if you use this file on a malicious/phishing site.

****Make a backup!**** Secure it like the millions of dollars it may one day be worth.

[Save Your Address. →](#)

Once that is done click on Save your address. Then you can open your wallet:

This is what the wallet looks like:

You can see your ETH address, use this address to ask for payments, send coins from Coinbase etc... This address is OK to share (this is the public address)

To send some coins, click on Send Ether & token:

Once you have ETH in your wallet this is where you can spend them (To buy BRIL for example).

So once Coinbase and MyEtherWallet are set-up, you need to buy some ETH on Coinbase and transfer them to your MEW (MyEtherWallet) wallet.

On Coinbase, you will have this screen

I don't have any ETH on Coinbase now but once you do, the "send" button will be available. Enter your **Public address** in the recipient and the amount of ETH you want to send. **Remember** your Private key (or private address) is **never meant to be used anywhere** unless you want to recover your wallet in it if you lose the UTC file for example.

In order to buy BRIL, you have to send ETH from your MEW wallet and NOT from Coinbase. This is because in order to claim your BRIL at the end of the ICO they will ask you to send a signed transaction from your wallet (you cannot do this from Coinbase).

So, to recap: Buy ETH on Coinbase > Send ETH from Coinbase to MEW > Send ETH from MEW to BRIL payment address.

Once you have sent your ETH, go to <https://pinnacle-brilliance.com/icopaymentform.html> Fill out the information on the form and you are good to go.
